How Airtraq simplifies Video Intubation

- Airtraq’s channel simplifies ETT insertion reducing intubation time.
- No stylet needed. Avoids potential injuries. Eliminates stylet costs.
- 90° shape minimizes hyperextension and reduces force required.
- Reduces hemodynamic reactivity.
- Facilitates intubation from any position (face to face, etc.).
- High intubation success rate in difficult airways.
- Easier to learn than other video laryngoscopes.

Visualization Options for any Airtraq model

- Wi-Fi Cam
- Endo Cams
- Phone Adapter
- Direct View

Simple, effective, affordable video laryngoscopy
Two complementary models for one complete solution

AIRTRAQ AVANT
Reusable Optics + Disposable Blades
Minimum cost per intubation. VL for frequent use.

AIRTRAQ SP
Fully Disposable
One piece. Ready to use. VL for remote locations and emergencies.

Airtraq improves routine intubations and it is specially effective for:
- Cervical immobilization
- Obese
- Awake
- In combination with a fiberscope
- Frontal or lateral intubations
- Poor dentition

Keep Middline
- Do not insert too deep

Lift gently
- Twist Airtraq to center vocal cords
- Corkscrew ETT if needed
